FORAY, Saturday, February 7, 1987,
to MacDonald Forest Study Area, and
other areas of the Forest. Meet at
Benton Center, 630 N. W. 7th, Corval-
lis, at 9:00 AM. Bring a lunch and
dress for the weather.

For more information, or a ride
to Benton Center for the carpool,
call Steve Morgan, 752-3218.

Steve Morgan
Trufflemaster

MEETING, Monday, February 9, 1987,
7:30 P. M., Large Conference Room,
Forest Sciences Lab, 3200 Jefferson
Way, Corvallis, OR.

Dr. Steven Miller will present
"A Field Key to Common Hypogeous
Basidiomycetes."

Steve is NATS Vice President.
He is doing post doctorate work on
the mycorrhiza and mycorrhizal fun-
gi of Red Alder. He worked and
studied with Dr. Orson K. Miller,
noted mycologist, while obtaining
his degree from Virginia Polytechnic
Institute.

For further information, con-
tact Steve Miller, 757-4408.

PORTLAND NATS FORAY, Saturday, Feb.
14, 1987. Meet at 10:00 A. M., in
the parking lot of the Far West
Federal Bank, corner of S. E. 82nd
and Division St. The foray will be
to the property of Mrs. Patricia
Reed, in the Molalla-Estacada area.
Dress for the weather and bring a
lunch.

PORTLAND NATS MEETING, Saturday,
February 7, 1987, 10:00 A. M., in
the basement meeting room of the
Far West Federal Bank at the corner
of S. E. 82nd and Division St.
For further information, call
Dan Wheeler, 774-0223.

Dan Wheeler
President

PORTLAND NATS NEWS

Officers for the Portland chap-
ter of NATS were elected at the Jan.
3, 1987 meeting. Unanimously elected
officers are: President, Dan Wheeler;
Vice President, Roger Knight; Secre-
tary, Janya Ross; Treasurer, Ben Bell.
Eight members were present.

The club decided to adopt the NATS Constitution, with the exception of meeting date, in order not to conflict with possible forays or meeting times in Corvallis.

A foray to Paul Bishop's Tree Farm, south of Oregon City, was held immediately after the meeting. Everyone found truffles, mostly Rhizopogon and Martellia species. A foray to the same location in December provided all members with finds of Rhizopogon, Martellia and Tuber species. Two collections, believed to be Alpova diplophoeus, were made but not sent for identification.

At the January foray a lingering truffle discovered two unknown truffles. One resembled Elaphomyces sp., but with a relatively thin peridium. The other truffle was similar to Genea sp.: hollow, irregularly lobed, nearly globose. The interior contained some white threads which gave the impression of cotton candy. At the base of the truffle, wiry rhizomorphs combined to form a stem-like structure with the appearance of a frayed rope end.

The Portland chapter is seeking tree farmers and land owners in the Portland area who are interested in seeing what type of truffles may be on their land. For information on forays, contact Dan Wheeler, 7714 SE Stephens, Portland, OR. 97215, or telephone 774-0223.

The new president will speak Jan. 31, 1987 to the Clackamas County Farm Forestry Association at Colton High School. The Association has many tree farmers in the Oregon City-Molalla-Estacada area, and may well generate more interest and collections of truffles in the state.

Dan Wheeler
President, Portland
Chapter of NATS

PRESIDENT'S COMMENTS

Our last two forays have been particularly outstanding due to the extra effort and time devoted to pre-

liminary scoutings of the areas by Steve Morgan, our trufflemaster. A large number of Oregon White truffles, delicious Picoa carthusiana and a number of other species were found. All foray members found some good truffles which is always gratifying to us. It is unfortunate that all of our members cannot participate in these great forays. Many thanks to you, Steve.

We hope all of our members are utilizing our newsletter long after it is received. Not only is it a good reference for a number of purposes, but it can be a very useful document in developing data for your own use. For example, it can help you determine when to look for certain species of truffles, as most species are found during certain months of the year. Also knowing that you can find a particular species only during certain months can help you in the identification process.

If you have retained all (or most) of your past copies of the newsletter, as most of us have done, it is a simple matter to develop a chart of species showing the months that the various species are found. This can be done from the finds that are listed in most of the newsletters which show the date of the find. The longer the period over which this is done, the more accurate your data will be. One of our very active members, Dan Wheeler, has developed a very comprehensive chart of this nature that he utilizes in his own truffling activities. It can be an invaluable tool.

Henry Pavelek
NATS President

A NEW PRODUCT is on the market. Wild Harvest Truffled Chardonnay Wine, a 1984 Chardonnay, has one ounce of Tuber gibbosum in each bottle.

For more information, contact Serendipity Cellars Winery, 15275 Dunn Forest Road, Monmouth, Oregon 97361.

NATS 1986 ANNUAL REPORT

The following are highlights of the 1986 activities of NATS:

Membership growth was substantial, from 213 to 287.

Eleven organized forays were held, plus two special forays for the Falls City and OMS shows.

A media event was attended at Falls City, OR., which received newspaper and TV coverage.

Three very successful truffle exhibits were set up and manned:

May 17-18, 1986 - Douglas County Family Forestry Expo near Glide, OR.

Oct 11-12, 1986 - Falls City Chanterelle Festival, Falls City, OR.

Oct 19, 1986 - OMS Mushroom Show, Western Forestry Center, Portland, OR.

In 1986 we had approximately 792 truffle collections which included 14 species novum and two possible species novum.

NATS CURRENT NEWS continued to be compiled, printed, and mailed to all members, keeping them informed of current news and finds.

The library has been expanded by 114 new references for a total of 614. In addition, 20 new recipes have been added to our collection.

The September issue of the NATIONAL GEOGRAPHIC magazine printed a picture of Henry Pavelek sniffing out a Tuber gibbosum Harkn. Also printed was a picture of a truffle pâté created by Karan and Frank Evans.

Dan Wheeler turned in 274 collections.

Dan Wheeler has organized a new chapter in Portland and held its first meeting December 6, 1986 at SE 82nd and Division, Portland, OR.

Welles Bushnell and Vernon Moore organized a special foray to the Klamath Falls area in the hopes of starting a satellite group there.

Frank Morris and his son, Bruce

Morris, met with Bob CortHELL and Bob Mahaffy, and Duke, a big Newfy Dog, for a foray near Coos Bay, OR, on Saturday, November 29, 1986. We will follow up with another foray to try to organize a group there for a future satellite chapter.

Projected 1987 budget: \$2500.00 income; \$2300.00 expenses; \$200.00 balance.

Respectfully submitted, Frank Morris, President, NATS.

NATS MEMBERSHIP DUES

If your address label has a red check mark (✓), your membership fee is due NOW. \$7.00 for the first family member, \$5.00 for each succeeding family member.

Membership deadline is March 1, 1987. Mail your check to: Vern Moore, Membership, PO Box 296, Corvallis, OR. 97339.

NAMA DUES may be renewed, or you may join NAMA through NATS, for \$12.00. Send your dues by separate check, made out to NAMA, to Welles Bushnell, NATS Treasurer, PO Box 296, Corvallis, OR. 97339.

NATS WELCOMES the following new members: Larry and Lee Merriman, Yamhill, OR.; Evelyn Orefice, Dortha L. Fay, Portland, OR.

COMMENTS FROM DR. TRAPPE

Rhizopogon vulgaris(Vitt.)Lange, collected by John Trappe, was an extremely large collection, enough that 15 people all had lots of sautéed ones for supper!

Rhizopogon zelleri Smith, collected by Dan Wheeler, 9/30/86, is RARE!

Rhizopogon clavitisporus Smith, collected by Henry Pavelek, 10/23/86, is very rare!

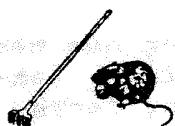

Barssia oregonensis Gilkey, collected by Henry Pavelek, 12/27/86, is a very unusual find in December as it is a "spring" species.

MYCOLOGIA ARTICLE

"Newly Described Hypogeous Fungi and the Mycorrhizae They Form in Vitro. 1. *Martellia medlockii* sp. nov. (Russulaceae)" is the title of an article appearing in MYCOLOGIA, 78(6), 1986, pp 918-921, by James M. Trappe and Michael A. Castellano.

This *Martellia* sp. novum was collected by Bill Medlock on his Sweet Home, OR, property in 1981, as part of the scientific program of NATS. The article includes a description of the species, and a page of photographs showing a cross sectional view of the spores, a cross-section of ectomycorrhiza with lodgepole pine, ectomycorrhizae on lodge pole pine, and a surface view of the spore ornamentation.

MYCOLOGIA, The Journal of the Mycological Society of America, is in the NATS library. Contact Don Johnson, Librarian, if you want to check out this, or other issues.

MAIL YOUR DUES TODAY

NEW MUSHROOM BOOKS

The long-awaited Peterson FIELD GUIDE TO MUSHROOMS OF NORTH AMERICA, by Kent and Vera McNight, is to be published in March 1987. It utilizes a simplified method of identification. We have requested a review copy and information on selling the book to our members. We will keep you posted on it as we get more information.

MUSHROOMS DEMYSTIFIED, by David Arora, has been revised and is now available on the market in both paper back and hardback editions. This is an outstanding book.

Henry Pavelek

DON'T FORGET to send in your dues. Membership year is from January 1 to December 31st.

Anyone joining after October 1st will be given membership for the following year.

March 1, 1987 is the deadline for renewing dues without being dropped from the mailing list. Mail your dues today!
